

Ednah Mamakoa was born in Mokopane Limpopo Province South Africa. She holds a BSc Community Water Services and Sanitation from University of Limpopo Turfloop South Africa, A BSc Hons Environmental Management at University of South Africa Pretoria, GDE in Civil and Environmental Engineering at University of Witwatersrand Johannesburg and currently registered for MSc in Chemical Engineering at Northwest University

Potchefstroom.

She has over eight years post graduate experience at Council for Scientific and Industrial Research working as a RESEARCHER in the field of environmental management focusing mainly on water and wastewater in the mining, water services and sanitation sectors. She has been directly involved in integrated water resources management, water quality management, wastewater treatment, groundwater development, poverty alleviation and stakeholder participation, and implementation and evaluation of water and sanitation projects. In addition, she also has extensive experience in policy formulation and analysis at the national, regional and international levels having worked for the research institution and implemented policy review and formulation projects. She has disseminated the research findings through publications, including journal, as well as the preparation and presentation of papers in local conferences.

Ms Mamakoa has been awarded MSc Bursary by the CSIR. She is a member of Young Water Professionals and South African Council for Natural Scientific Professionals.
